EDUCATION

McMaster University

Bachelors of Mechanical Engineering and Management, Co-op

Hamilton, ON

Sep. 2025 – April 2031

EXPERIENCE

Mechanical Engineering Intern

April 2026 – Sep 2026

Elite Road Supplies Co.

Abu Dhabi, UAE

- * Conducted basic technical research and data collection to support ongoing engineering projects
- * Supported engineers with CAD modelling and modifications to existing mechanical components and assemblies.
- * Participated in site/project meetings and gained exposure to engineering workflows, safety requirements, and project coordination.

Private Tutor

Sep. 2025 – Sep. 2026

Independent Tutoring

Oakville, ON

- * Provided one-on-one tutoring in mathematics, physics, and chemistry, adapting instruction to individual learning needs and academic goals.
- * Guided students through complex quantitative problems using structured analytical and problem-solving techniques.
- * Developed personalized study plans and practice materials to strengthen conceptual understanding and prepare students for assessments.

Mechanical Engineering Intern

June 2025 – Sep 2025

Al Fursan Corner Co.

Abu Dhabi, UAE

- * Assisted with HVAC system design and equipment selection for residential and commercial projects based on project requirements.
- * Supported cooling-load calculations and reviewed mechanical drawings, duct layouts, and equipment specifications.
- * Participated in site inspections to verify HVAC installations, identify issues, and ensure work aligned with engineering drawings and project standards.

PROJECTS

Rotating Arm Basket Mechanism | Python, Autodesk Inventor, Excel

Sep 2025 – Dec 2025

- * Designed and developed a rotating-arm mechanism capable of transporting and accurately positioning objects using a basket system.
- * Created and refined CAD models while applying mechanical design principles to improve the system's stability, motion, and reliability.
- * Prototyped and tested the mechanism through iterative trials, identifying design limitations and implementing improvements to achieve consistent performance.

Automated Ball Launcher | Autodesk Inventor, Python, Arduino, Excel

Jan 2026 – April 2026

- * Designed and prototyped a mechanical ball launcher capable of consistently propelling balls toward designated targets.
- * Developed detailed CAD models and optimized the launching mechanism through component selection, mechanical analysis, and iterative design.
- * Conducted performance testing and refined the prototype based on launch distance, accuracy, and repeatability to improve overall system performance.

TECHNICAL SKILLS

Programming: MATLAB, Python, Arduino

CAD and Design: AutoCAD, Autodesk Inventor, Technical Drawings

Engineering Analysis: ANSYS Granta EduPack, Material Selection, Experimental Testing, Data Analysis

Prototyping and Software: 3D Printing, Rapid Prototyping, Mechanical Assembly, PASCO Capstone, Microsoft Excel
